

Ubiquitous Social Learning Enhanced by MOOCs and Big Data Analytics

Speaker:

Prof. Qun Jin

Department of Human Informatics and Cognitive Sciences,
Waseda University, Japan

Abstract:

Wireless communication technologies and mobile devices (such as smartphones and tablets) make it possible for anyone to access the Internet from anywhere and connect each other at any time, and emerging ubiquitous and cloud computing platforms empowered by big data analytics make it possible to create individual user models and provide context- and situation-aware individualized services. In the past few years, MOOCs and individualized learning
